Work Experience

Senior Backend Developer (Java) at FA Solutions

Jun 2023 – July 2025

Software Product Development

- Back-end development of Asset management software product, financial calculation engine, with domain-driven design practice
- Legacy code base maintenance and new feature implementation of core product (Java SE 17) originally developed with Spring Boot and Vaadin
- Investment and accounting logic design and implementation
- Code level architectural design
- Code review
- Vibe coding
- Basic operations with Kubernetes (kubectl) in Azure cluster containing many microservices
- Bitbucket CI pipeline optimization
- Keycloak maintenance
- Product release
- Shell script and Python automation

Working Language: English, Finnish

Technical Stack: Java SE 17, Spring Boot, Vaadin, design patterns and principles, software architecture, JUnit 5, Test Container, GIT, Bitbucket, Maven, Continuous Integration, IntelliJ, Agile, Azure, Kubernetes, Helm, Python, Shell

Senior Software Designer (Java) at Suomen sijoitustutkimus

Nov 2020 – Jun 2023

In-house Software product Development

- Back-end development of in-house software product, financial calculation engine, with domain-driven design practice
- Legacy code base maintenance of core product with monolith structure (Java SE 8)
- Financial and accounting batch calculation logic design and implementation in Java SE 8-11
- Code level architectural design
- Basic operations on AWS
- Shell and Python script automation

Working Language: English, Finnish

Technical Stack: Java SE 8-11, design patterns and principles, software architecture, JUnit 5, GIT, Bitbucket, GitLab, Maven, Continuous Integration, IntelliJ, Agile, AWS, Python, Shell

Software Designer (Java) at Signant Health

May 2019 – October 2020

Software Product Development (R & D)

- Software product development with domain-driven design practice in scrum team
- Legacy code maintenance (J2EE)
- Complicated back-end business logic design and implementation in Java SE 8 and Java EE 7
- REST API implementation with Jersey
- JSF, EJB, JMS
- Scratched the surface of LDAP (Ping Directory), SCIM, SSO

Working Language: English

Technical Stack: Java SE 8, Java EE 7, design patterns and principles, software architecture, REST API, LDAP, SCIM, SSO, JSF, Jersey, JUnit, Mockito, GIT, Gerrit, Maven, Jenkins, Eclipse, IntelliJ, Agile, Scrum

Java Developer at Software Point Oy

December 2017 – May 2019

Software Product Development

- Software product development with Agile
- Complicated business process implementation in legacy Java and Java SE 8
- Front-end Javascript work as minor

Working Language: Finnish, English

Technical Stack: Java SE 8, design patterns and principles, software architecture, JUnit, Mockito, JavaScript, jQuery, Ajax, SVN, Maven, Jenkins, Docker, IntelliJ, Agile, Jira, Confluence

Consultant at Affecto

June 2015 – October 2017

Outsourcing Software Projects

- Big data ETL development in MapR's Hadoop Ecosystem inside Linux cluster
- Linux cluster maintenance
- Workflow automation with Bash scripting and Oozie
- Basic Hadoop MapReduce coding
- Relational databases
- Web Form application and REST API implementation with Spring 4, including Spring Web MVC, Hibernate, with Java 8

Working Language: Finnish

Technical Stack: Hadoop 2, SQL, MySQL, Spark, Oozie, Zookeeper, MapR, AWS S3, ELK, Java 8, Spring 4, Spring Boot, Hibernate, Tomcat, Bash, Ansible, Linux cluster, Eclipse, Maven, Git, REST API, Agile, JUnit 5

Thesis Worker at Aalto University

January 2015 – June 2015

Education institution

- Working on thesis subject – SQL Engines for Big Data Analytics: SQL on Hadoop

Working Language: English

Technical Stack: Hadoop, SQL, Hive, Spark, Spark SQL, Big Data, Bash, Java, Scala, R, Eclipse, Maven, Git, Linux cluster, SLURM

Technical Summer Trainee at RAY (Raha-automaattiyhdistys)

May 2014 – August 2014

Gambling game industry

- Statistical hypothesis tests implementation in C with standard C99

Working Language: Finnish

Technical Stack: C, Make, Git, Linux, statistics

Analyst Programmer at Accenture Oyj

May 2007 – June 2011

Outsourcing Software Projects

- Data export from Oracle database to Microsoft Excel with Java and SQL Developer
- SQL optimization
- Functional design and implementation documentation
- Relational database system design implementation in financial transaction system

Working Language: English

Technical Stack: Oracle database, SQL, JDBC, SVN, documentation, financial transaction system, waterfall

Education

Master of Science in Technology – Aalto University

September 2008 – December 2015

Subjects: IT, major in software technology (full-time working until summer 2011)

BBA – Turku University of Applied Science

September 2003 – May 2007

Subjects: Business IT (specialized in IT)
